Obs:

- For the dissertation examination, brief Power-Point presentations (max. 10 min) are recommended.
- Preparing the application or the practical part to be presented to the committee lies within the responsibility of the student. Before starting the presentation, the student must ensure that the application/practical part works appropriately and can be presented to the committee.
- For the students that have a practical part to be presented we strongly recommend that they make a prior recording with all the operations so that during the presentation if the practical part for various reasons no longer works, it is possible to present the recording.
- Candidates should arrive in IE303 at least one hour before they are scheduled.
